

Aditya Pareek

+917002175645 ◇ pareekaditya0007@gmail.com ◇ India ◇ [LinkedIn](#)

SKILLS

Languages Java, Python, C++, JavaScript, SQL

Databases PostgreSQL, MongoDB

Developer Tools Git, GitHub, Postman

Web Development React.js, Next.js, Node.js, Express.js, FastAPI, HTML, CSS, REST APIs

Concepts DSA, OOP, DBMS, Probability & Statistics, Linear Algebra, Artificial Intelligence, Machine Learning

AI & NLP Machine Learning, TF-IDF, OpenAI API Integration, Prompt Engineering, Scikit-Learn, NumPy, Pandas

EXPERIENCE

Full Stack Development Intern

May '26 — Jun '26

Decode Labs

Remote

- Engineered backend database models in PostgreSQL, optimizing data retrieval speeds for core workflows.
- Built and integrated 10+ REST APIs for secure authentication and data management.
- Architected 15+ reusable UI components, accelerating frontend development velocity by ~20%.
- Resolved 25+ frontend and backend issues through debugging and collaborative code reviews.

Technical Team Member

Sep '25 — Present

Microsoft Student Chapter, VIT-AP

Amaravati, India

- Organized 5+ technical workshops, hackathons, and coding events for 100+ students.
- Collaborated with student leaders to execute technology initiatives across campus.

EDUCATION

B.Tech in Computer Science & Engineering, Vellore Institute of Technology, Amaravati (VIT-AP)

Jun '24 — Jun '28

(GPA: 8.73/10)

Amaravati, India

- Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Design and Analysis of Algorithms, Web Technologies.

PROJECTS

AI-Powered Finance Tracker | Next.js, Supabase, Gemini API [Link](#)

Jun '26 — Jun '26

- Engineered an AI-powered finance tracking platform using Next.js, Supabase, Prisma ORM, and Gemini API, automating categorization for 500+ transactions and reducing manual expense tracking effort by ~60%.
- Designed and optimized PostgreSQL database schemas and queries to deliver real-time financial analytics under 100ms, implementing secure Row-Level Security (RLS) policies for concurrent user data streams.

Machine Learning-Based Resume Screening & Ranking System [Link](#)

May '26 — Jun '26

- Built an AI-powered resume screening platform using Next.js, FastAPI, and OpenAI, cutting screening time by ~70%.
- Implemented TF-IDF matching and ATS scoring across 100+ resume-job description pairs.
- Developed 8+ REST APIs and analytics dashboards for candidate ranking and shortlisting.

Config-Driven Full Stack App Runtime Full Stack Platform | React, Node.js, PostgreSQL [Link](#)

Apr '26 — May '26

- Engineered a config-driven platform that generated 20+ UI modules and APIs from JSON configurations.
- Automated schema generation and CRUD operations for 15+ entities, reducing backend setup effort by ~80%.
- Implemented secure authentication and modular architecture for scalable applications.
- Enabled no-code application customization through JSON-driven configurations, allowing dynamic UI generation, workflow management, and rapid feature rollout across multiple business use cases.

ACHIEVEMENTS

- Solved 450+ problems on LeetCode and achieved a 1700+ contest rating (Top 12%), demonstrating strong proficiency in Java and Data Structures & Algorithms.
- Selected as an Open Source Contributor for GirlScript Summer of Code (GSSoC) 2026, contributing features, bug fixes, and pull requests to open-source projects.

CERTIFICATIONS

Google AI Professional Certificate, Google

AWS Cloud Practitioner Essentials, Amazon Web Services (AWS)

AWS Academy Graduate – Generative AI Foundations (AWS)
